COASTAL ENGINEERING

Contents Volumes 1–30

Practical solution to a beach erosion problem
P. Bruun 1 (1977) 3
The stability of some currently used wave parameters
H. Rye 1 (1977) 17
Longshore circulation around a conical island
C.C. Mei and D. Angelides 1 (1977) 31
Refraction of cnoidal waves
O. Skovgaard and M.H. Petersen 1 (1977) 43
Transmission of random wind waves through perforated or porous breakwaters
S.R. Massel and C.C. Mei 1 (1977) 63
Mass transport in water waves propagated over a permeable bed
Ph.L.-F. Liu 1 (1977) 79
Dune erosion during a storm surge
J. van de Graaff 1 (1977) 99
On gravity waves propagated over a layered permeable bed
Ph.L.-F. Liu 1 (1977) 135
Wave forces on inclined tubes
S.K. Chakrabarti, A. Wolbert and W.A. Tam 1 (1977) 149
On the development of solitary waves on a horizontal bed with friction
E. Özhan and H. Shi-igai 1 (1977) 167
An eigenfunction parameterization of a time sequence of wave spectra
C.L. Vincent and D.T. Resio 1 (1977) 185
Mass transport in the free-surface boundary layers
Ph.L.-F. Liu 1 (1977) 207
An analytical and computer study on wave overtopping
H. Shi-igai and R.C. Shu 1 (1977) 221
Wind velocity distribution over wind-generated water waves
J. Dattatri, N. Jothi Shankar and H. Raman 1 (1977) 243
The wave height variation for regular waves in shoaling water
I.A. Svendsen and J. Buhr 1 (1977) 261
Port Engineering, by P. Bruun
J.W. Kamphuis 1 (1977) 285
Stability of sloping structures in relation to $\xi = \tan\alpha / \sqrt{H/L_o}$ risk criteria in design
P. Bruun and A.R. Günbak 1 (1977) 287
Improvement study for the Parachique tidal inlet
R. Moor 1 (1977) 323
Shore protection using stones enclosed in nets
N.N. Pillai and D.V.S. Verma 1 (1977) 349
The stability of some currently used wave parameters – a discussion
S.K. Chakrabarti and R.P. Cooley 1 (1977) 359
The stability of some currently used wave parameters – a reply
H. Rye 1 (1977) 367

Determination of a bed friction factor for Botany Bay, Australia
P.D. Treloar and C.L. Abernethy 2 (1978) 1
A new photogrammetric method for determining shoreline erosion
R. Dolan, B. Hayden and J. Heywood 2 (1978) 21
Analysis of coastal erosion and storm surge hazards
R. Dolan, B. Hayden and J. Heywood 2 (1978) 41
Surface wave heights from pressure records
R.A. Grace 2 (1978) 55
Bed friction characteristics of three tidal entrances
A.J. Mehta 2 (1978) 69
Stability measurements of rubble-mound breakwaters
B. Kristinsson and J. Eliassen 2 (1978) 93
Waves in a severe storm in the central English Channel
G. Henderson and N.B. Webber 2 (1978) 95
Attenuation of gravity waves by bottom friction
J.W. Kamphuis 2 (1978) 111
Circulation and salinity distribution in coastal inlets
I.V. Muralikrishna and R. Devanathan 2 (1978) 119
A review of selected literature on sand stabilisation
C.J. Phillips and B.B. Willets 2 (1978) 133
Sinusoidal flow past a circular cylinder
D.J. Maull and M.G. Milliner 2 (1978) 149
Mass transport in water waves propagated over a permeable bed (Liu, 1977)
J.F.A. Sleath 2 (1978) 169
Sturmflut, by M. Petersen and H. Rohde
E.W. Bijker 2 (1978) 173
Bottom Turbulence, by J.C.J. Nihoul (Editor)
O.S. Madsen 2 (1978) 174
Fundamentals of Marine Acoustics, by J.W. Caruthers
D.J. Creasey 2 (1978) 175
Concerning the recurrence of abnormal sea levels
J. Graff 2 (1978) 177
The effect of wave grouping on on-shore structures
H.F. Burcharth 2 (1978) 189
Beach profiles at Gorleston and Great Yarmouth
S. Aranuvachapun and J.A. Johnson 2 (1978) 201
Management considerations for beach nourishment at Sandy Hook, New Jersey, U.S.A.
K.F. Nordstrom, J.R. Allen, D.J. Sherman and N.P. Psuty 2 (1978) 215
Higher-order waves propagating on constant vorticity currents in deep water
I. Brevik 2 (1978) 237
Common reasons for damage or breakdown of mound breakwaters
P. Bruun 2 (1978) 261
Incipient motion of arbitrary shape particles under solitary waves
E. Naheer 2 (1978) 277
Long-term wave-force statistics for a vertical pile
G. Moe 2 (1978) 297
Remarks on set-down for wave groups and wave-current systems
I. Brevik 2 (1978) 313
What direction coastal engineering?
R. Silvester 2 (1978) 327
Spatial and temporal analyses of shoreline variations
B. Hayden, R. Dolan and W. Felder 2 (1978) 351

Evaluation of sediment transport formulae in coastal engineering practice
J. van de Graaff and J. van Overeem 3 (1979) 1
The reliability of visually observed wave heights
T.P. Jardine 3 (1979) 33
Comparison of computed and observed breaker wave heights
E. Bryant 3 (1979) 39
Overspilling/overtopping of rubble-mound breakwaters. Results of studies useful in design procedures
O.J. Jensen and T. Sorensen 3 (1979) 51
Determination of a bed friction factor for Botany Bay, Australia – a discussion
I.G. Jonsson 3 (1979) 67
Air Photography and Coastal Problems, by M.T. El-Ashry
C.L. Vincent 3 (1979) 71
Submersibles and their Use in Oceanography and Ocean Engineering, by R.A. Geyer
J.D. Woods 3 (1979) 71
Fundamentals of Ocean Dynamics by V.M. Kamenkovich
H. Stommel 3 (1979) 73
The joint effect of the wave height and period on the stability of rubble mound breakwaters using Iribarren's number
M.A. Losada and L.A. Giménez-Curto 3 (1979) 77
Equilibrium flow areas in the Rhine–Meuse Delta
J. Van de Kreeke and J. Haring 3 (1979) 97
Longshore sand transports rates – a simple model for the East Anglian coastline
C.E. Vincent 3 (1979) 113
Common reasons for damage or breakdown of mound breakwaters: discussion
S. Kjelstrup 3 (1979) 137
Hydrodynamics of Estuaries and Fjords, by J.C.J. Nihoul (Editor)
D.L. Wilkinson and D.N. Foster 3 (1979) 143
Basic Coastal Engineering, by R.M. Sorensen
J.A. Battjes 3 (1979) 143
Coastal Engineering: an Introduction to Ocean Engineering, by K. Horikawa
B. Johns 3 (1979) 146
The Bearing Capacity of Building Foundations, by A. Myslivec and A. Kézdi 3 (1979) 147
Flume experiment on waves and currents. I. Rippled bed
I. Brevik and B. Aas 3 (1979) 149
Developments of stream-function wave theory
J.R. Chaplin 3 (1979) 179
The Modelling of the approach of bores to a shoreline
B. Johns 3 (1979) 207
The propagation of solitary waves and bores over a porous bed
A.R. Packwood and D.H. Peregrine 3 (1979) 221
Drainage Basin Morphology, by S.A. Schumm (Editor)
C. Embleton 3 (1979) 243
Stress in Subsoil and Methods of Final Settlement Calculation, by J. Feda
W.F. Chen 3 (1979) 244
Stability of Tidal Inlets – Theory and Engineering, by P. Bruun, co-authors A.J. Mehta and I.G. Johnson
F. Gerritsen 3 (1979) 246
Computational Hydraulics. Elements of the Theory of Free Surface Flows, by M. Abbott
W.R. Waldrop 3 (1979) 248
Wave direction estimates in coastal waters using radar
A.D. Heathershaw, M.W.L. Blackley and P.J. Hardcastle 3 (1979) 249
Simulation model analysis of seasonal beach cycles
W.N. Felder and J.S. Fisher 3 (1979) 269

Beach erosion at Klim, Denmark. A ten-year record
Chr. Christiansen and J.T. Møller 3 (1979) 283
Incipient motion of discrete spheres under solitary waves
E. Naheer 3 (1979) 297
Soil Physics. Selected Topics, by A. Kézdi
A. Myslivec 3 (1979) 317

Run-up of non-breaking waves – a finite-element approach
T.C. Gopalakrishnan and C.C. Tung 4 (1980) 3
Field observations of the threshold of sand motion in a transitional wave boundary layer
A.G. Davies 4 (1980) 23
Mathematical modelling of beaches backed by seawalls
H. Ozasa and A.H. Brampton 4 (1980) 47
Wave shoaling calculated from Cokelet's theory
T. Sakai and J.A. Battjes 4 (1980) 65
Flume experiments on waves and currents II. Smooth bed
I. Brevik 4 (1980) 89
Consequences of training walls and jetties for aquatic habitats at two British Columbia estuaries
C.D. Levings 4 (1980) 111
Breaking wave characteristics on a plane beach
J.D. Wang and B. Le Mehaute 4 (1980) 137
Hurricane Eloise wave spectra
Y.K. Lee 4 (1980) 151
Influence of a small inlet in a large bay
A.J. Mehta and T.A. Zeh 4 (1980) 157
Evaluation of sediment transport formulae in coastal engineering practice – Discussion
D.H. Willis 4 (1980) 177
Evaluation of sediment transport formulae in coastal engineering practice – Reply
J. Van de Graaff 4 (1980) 180
Dredging: A Handbook for Engineerings by R.N. Bray
T.C. Whalen 4 (1980) 183
Soil Physics by T.J. Marshall and J.W. Holmes
A. Myslivec 4 (1980) 184
Rockfill in Hydraulic Engineering by D. Stephenson
C.L. Begemann 4 (1980) 185
Flow characteristics on rough, permeable slopes under wave action
M.A. Losada and L.A. Giménez-Curto 4 (1980) 187
Coastal erosion and the sediment budget, with special reference to the Gold Coast, Australia
D.M. Chapman 4 (1980) 207
Full-scale dynamic testing of dolosse to destruction
H.F. Burcharth 4 (1980) 229
A profile zonation for seasonal sand beaches from wave climate
R.J. Hallermeyer 4 (1980) 253
Numerical Modelling of Marine Hydrodynamics, Application to Dynamic Physical Processes by H.-G. Raming and Z. Kowalik
R.A. Flather 4 (1980) 279
An effective way of increasing the stability of quays
S.A. Ghali 4 (1980) 281
A comparison of nature waves and model waves with special reference to wave grouping
H.F. Burcharth 4 (1980) 303
An experimental study of the transformation zone of plunging breakers
T.S. Hedges 4 (1980) 319

Some important considerations in the analysis of annual maximum sea-levels
A.T. Walden, P. Prescott and N.B. Webber 4 (1980) 335

Wave spectral transformation measurements at Sylt, North Sea
H. Wang and Wei.-C. Yang 5 (1981) 1
Modification of edge waves by barred-beach topography
J.T. Kirby, jr., R.A. Dalrymple and P.L.-F. Liu 5 (1981) 35
Laboratory study on the shoreline changes behind a coastal structure
K. Mizumura and N. Shiraishi 5 (1981) 51
A method to calculate the probability of exceedance of the design wave height
J. van Heteren and J. Bruinsma 5 (1981) 83
An Environmental Appraisal of Tidal Power Stations: with Particular Reference to the Severn Barrage by T.I. Shaw (Editor)
H.W. Kamphuis 5 (1981) 93
On the estimation of wind wave spectra by parametric methods
S. Fines, O.G. Houmb, K. Mo and T. Overvik 5 (1981) 97
The Faroese wave- and current-measuring project
E. Davidsen and B. Hansen 5 (1981) 111
Mult-year pressure ridges in the Canadian Beaufort Sea
B. Wright, J. Hnatiuk and A. Kovacs 5 (1981) 125
An approximation to the failure probability of maritime structures under a sea state
M.A. Losada and L.A. Giménez-Curto 5 (1981) 147
Probable ice thickness of the Arctic Ocean
D.R. Blidberg, R.W. Corell and A.S. Westnat 5 (1981) 159
Practical views on the design and construction of mound breakwaters
P. Bruun and S. Kjelstrup 5 (1981) 171
Landfast ice motion observed in the Mackenzie Delta region of the southern Beaufort Sea in the 1972/1973 winter
L.G. Spedding 5 (1981) 193
Some influences of ice rubble field formations around artificial islands in deep water
N. Allyn and B.R. Wasilewski 5 (1981) 211
Morphology and hazards related to nearshore ice in coastal areas
W.J. Stringer 5 (1981) 229
Ice pile-up and ride-up on arctic and subarctic beaches
A. Kovacs and D.S. Sodhi 5 (1981) 247
Random wave tests on a damaged breakwater in Himekawa Harbour, Japan
M. Yamamoto, T. Endo, A. Hasegawa and K. Tsunakawa 5 (1981) 275
Field measurements of longshore currents on a barred beach
J.H. Allender and J.D. Ditmars 5 (1981) 295
Expeditious regimes of artificial beach nourishment or dredging
H. Allison 5 (1981) 311
Analysis of basic wave data at Salaverry (Peru) and some practical applications
R. Moor 5 (1981) 331
A theoretical study of plunging breakers and their run-up
M.S. Kirkgöz 5 (1981) 353
Forces associated to different fluid properties as affected by scaling
F. Vasco Costa 5 (1981) 371
Hurricane Eloise wave spectra – A discussion
R.J. Sobey 5 (1981) 379
Hurricane Eloise wave spectra – Reply
Y.K. Lee 5 (1981) 380

A study of radiation stress and set-up in the nearshore region
M.J.F. Stive and H.G. Wind 6 (1982) 1

A pure finite-element method for the Saint-Venant equations
P.D. Scarlatos 6 (1982) 27
A case study of wave height variations due to currents in a tidal entrance
J.A. Battjes 6 (1982) 47
The examination of surge–tide interaction at two ports on the central south coast of England
A.T. Walden, P. Prescott and N.B. Webber 6 (1982) 59
An alternative approach to the joint probability method for extreme high sea level computations
A.T. Walden, P. Prescott and N.B. Webber 6 (1982) 71
Mound breakwaters under oblique wave attack: a working hypothesis
M.A. Losada and L.A. Gimenez-Curto 6 (1982) 83
On the second approximation to mass transport in the bottom boundary layer
B.D. Dore. 6 (1982) 93
Drift velocity at the wave breaking point
H. Wang, T. Sunamura and P.A. Hwang 6 (1982) 121
The effect of jet formation on the velocity distribution in oscillatory flow over flat beds of sand or gravel
J.F.A. Sleath 6 (1982) 151
The influence of a research pier on beach morphology and the distribution of *Emerita talpoida*
M. Bowman and R. Dolan 6 (1982) 179
Long waves in directional seas
S.E. Sand 6 (1982) 195
Laboratory experiments on wave transmission by overtopping
D.G. Hamer and F.C. Hamer. 6 (1982) 209
Prediction of water levels in a tidal inlet
K. Mizumura 6 (1982) 217
Measurements of particle velocities in laboratory-scale random waves
K. Anastasiou, R.G. Tickel and J.R. Chaplin 6 (1982) 233
Verification of numcerical wave propagation models for simple harmonic linear water waves
J.C.W. Berkhoff, N. Booy and A.C. Radder. 6 (1982) 255
Frequency of tidal storm surge at New Harbor (New York) and Newark Bay (New Yersey)
A. Balloffet, M.L. Scheffler and T.F. Sergi 6 (1982) 281
Ecohydrodynamics, Proceedings of the 12th International Liege Colloquium on Ocean Hydrodynamics by J.C.J. Nihoul (Editor)
J.P. Bethoux 6 (1982) 299
Coastal Hydraulics by A.M. Nuir Wood and C.A. Fleming
J.A. Battjes 6 (1982) 300
The parameterisation and prediction of wave height and wind speed persistence statistics for oil industry operational planning purposes
C. Graham 6 (1982) 303
The closure of tidal basins
G. van Houweninge and A. de Graauw 6 (1982) 331
Beach and dune erosion during storm surges
P. Vellinga 6 (1982) 361
Explicit formulae for practical wave calculations
P. Nielsen. 6 (1982) 389

Numerical model of the shoreline change at Oarai Beach
N.C. Kraus and S. Harikai 7 (1983) 1
The influence of beach porosity on wave uprush and backwash
A.R. Packwood. 7 (1983) 29
Open-boundary conditions for open-coast hurricane storm surge
B.A. Harper and R.J. Sobey 7 (1983) 41

Initiation of sand transport over coarse beds in tidal entrances
A.J. Mehta and B.A. Christensen 7 (1983) 61
Review of conditions for uses of the Bruun Rule of erosion
P. Bruun 7 (1983) 77
On the structural integrity of dolos units under dynamic loading conditions
G.W. Timco 7 (1983) 91
Comments on the paper by G.W. Timco ''On the structural integrity of dolos units under dynamic loading conditions''
H.F. Burcharth 7 (1983) 97
Wave setup/setdown and longshore current on non-planar beaches
W.G. McDougal and R.T. Hudspeth 7 (1983) 103
Longshore sediment transport on non-planar beaches
W.G. McDougal and R.T. Hudspeth 7 (1983) 119
The effect of an offshore bank in attenuating waves
M.J. Tucker, A.P. Carr and E.G. Pitt 7 (1983) 133
Measurements of coastal suspended sediment concentrations
S.M. Antsyferov, T. Basiński and N.V. Pykhov 7 (1983) 145
Beach scraping—it is damaging to beach stability?
P. Bruun 7 (1983) 167
Laboratory study on the shoreline changes behind a coastal structure by K. Mizumura and N. Shirashi—Discussion
R. Silvester 7 (1983) 175
Laboratory study on the shoreline changes behind a coastal structure by K. Mizumura and N. Shirashi—Discussion
P. Bruun 7 (1983) 177
Mexican Symposium on Port Planning Design and Construction
P. Bruun 7 (1983) 183
A note on the accuracy of the mild-slope equation
N. Booij 7 (1983) 191

A hydrostatic profiler for nearshore surveying
R.J. Seymour and D.P. Bothman 8 (1984) 1
Effects of nonlinear inertial forces on nearshore currents
C.-S. Wu and P.L.-F. Liu 8 (1984) 15
The damping of gravity water-waves due to percolation
P.L.-F. Liu and R.A. Dalrymple 8 (1984) 33
Field measurements of time-averaged suspended sediment concentration under waves
P. Nielsen 8 (1984) 51
Performance of a numerical short-wave model
P.A. Madsen and I.R. Warren 8 (1984) 73
The effect of an offshore bank in attenuating waves, by M.J. Tucker, A.P. Can and E.G. Pitt
J.A. Battjes 8 (1984) 95
The effect of an offshore bank in attenuating waves
M.J. Tucker, A.P. Can and E.G. Pitt 8 (1984) 96
Energy dissipation in waves breaking on gentle slopes
M.J.F. Stive 8 (1984) 99
Measuring run-up on a natural beach
R.A. Holman and P.T. Guza 8 (1984) 129
A review of methods to establish the wave climate for breakwater design
J.A. Battjes 8 (1984) 141
On The stability criterion for fracture in dolos-armoured breakwaters
G.W. Timco 8 (1984) 161
Beach and dune erosion during storm surges, by P. Vellinga
P. Bruun 8 (1984) 171

A tentative description of a universal erosion profile for sandy beaches and rock beaches
P. Vellinga 8 (1984) 177
Beach and dune erosion during storm surges, by P. Vellinga
S. Bose 8 (1984) 189
Beach and dune erosion during storm surges
P. Vellinga 8 (1984) 191
On rubble-mound breakwaters of composite slope, by E. Naheer and V. Buslov
R. Silvester 8 (1984) 193
On rubble-mound breakwaters of composite slope
E. Naheer and V. Buslov 8 (1984) 195
Performance documentation of the Longard tube at Del Mar, California1980–1983
R.E. Flick and B.W. Waldorf 8 (1984) 199
Verification of a parabolic equation for propagation of weakly-non-linear waves
J.T. Kirby and R.A. Dalrymple 8 (1984) 219
Breaking wave forces and velocity fields
W.J. Easson and C.A. Greated 8 (1984) 233
Deterministic decomposition of pitch-and-roll buoy measurements
S.E. Sand 8 (1984) 243
Behaviour of rubble-mounds breakwater in directional and uni-directional waves
F.T. Christensen, P.C. Broberg, S.E. Sand and P. Tryde 8 (1984) 265
Forces and moment on a horizontal plate due to wave scattering
M. Patarapanich 8 (1984) 279
Wave heights and set-up in a surf zone
I.A. Svendsen. 8 (1984) 303
Experiments on full-scale wave impact pressures 8 (1984) 331
Mass flux and undertow in a surf zone
I.A. Svendsen. 8 (1984) 347
The visual estimation of shore-breaking wave heights
J. Balsillie and R.W.G. Carter 8 (1984) 367
Surfzone currents, by D.R. Basco
J.T. Kirby and R.A. Dalrymple 8 (1984) 387
Surfzone currents
D.R. Basco 8 (1984) 389

Characteristics of storm waves off the Mediterranean coast of Israel
Z. Carmel, D.L. Inman and A. Golik 9 (1985) 1
Directional wave measurement at Haifa, Israel, and sediment transportalong the Nile littoral cell
Z. Carmel, D.L. Inman and A. Golik 9 (1985) 21
Unified modeling guidance based on a sedimentation parameter for beach changes
R.J. Hallermeier 9 (1985) 37
Field evaluation of a beach profile response to steepness as predicted by the Dean model
J.R. Allen. 9 (1985) 71
Formation of beach cusps in a wave tank
A. Kaneko 9 (1985) 81
Asymmetrical breakwater gap wave diffraction using finite and infinite elements
J.D. Pos 9 (1985) 101
A practical alternative to the mild-slope wave equation
G.J.M. Copeland 9 (1985) 125
A scale comparison of waves breaking on a beach
M.J.F. Stive. 9 (1985) 151
Energy dissipation in oscillatory flow over rippled beds
J.F.A. Sleath 9 (1985) 159
Vertical distribution of the suspended sediment concentrations seawards of the breaking zone
R.D. Kos'yan 9 (1985) 171

Discussion of Rubble mound breakwaters of composite slopes, by E. Naheer and V. Buslov
P. Bruun 9 (1985) 189
Practical radiation stress calculations connected with equations of wave propagation
G.J.M. Copeland 9 (1985) 195
Numerical simulation of time-dependent beach and dune erosion
D.L. Kriebel and R.G. Dean 9 (1985) 221
The influence of currents on ocean wave climates
R. Burrows and T.S. Hedges 9 (1985) 247
On the structure of oscillatory boundary layers
P. Nielsen 9 (1985) 261
Sediment transport and beach equilibrium profile
I.O. Leont'ev 9 (1985) 277
Calibration of a two-dimensional dydrodynamics model
W.-S. Chen and W.W.-G. Yeh 9 (1985) 298
Calculation and application of first-order cnoidal wave theory
M. Isobe 9 (1985) 309
Sediment by-passing across coastal inlets by natural means
R. Silvester 9 (1985) 327
Prediction of nearshore wave heights using a refraction programme
N.P. Kurian, M. Baba and T.S.S. Hameed 9 (1985) 347
Incipient motion on a horizontal granular bed in non-breaking water waves
M.A. Losada and J.M. Desiré 9 (1985) 357
Wave reflection and transmission at permeable breakwaters of arbitrary cross-section
W. Sulisz 9 (1985) 371
Experiments on full-scale wave impact pressures, by P.A. Blackmore and P.J. Hewson
T.S. Hedges, P.A. Blackmore and P.J. Hewson 9 (1985) 387
Directional wave measurement at Haifa, Israel, and sediment transport along the Nile littoral cell, by Z. Carmel, D.L. Inman and A. Golik
C. Galvin, Z. Carmel, D.L. Inman and A. Golik 9 (1985) 398
Intercomparison of near-bottom kinematics by several wave theories and field and laboratory data
R.G. Dean and M. Perlin 9 (1985) 399
Spectral wave refraction under the influence of depth and current
P.D. Treloar 9 (1985) 439
Laboratory observations of the kinematics in the aerated region of breaking waves
P.C.M. Jansen 9 (1985) 453
Probabilistic design of dunes; an example from the Netherlands
J. van de Graaf 9 (1985) 479
Literature review of sand transport by wind on a dry sand surface
K. Horikawa, S. Hotta and N.C. Kraus 9 (1985) 503
Extreme value statistics for wave run-up on a natural beach
R.A. Holman 9 (1985) 527
An approximate model for nonlinear dispersion in monochromatic wave propagation models
J.T. Kirby and R.A. Dalrymple 9 (1985) 545
The estimation of wave height and wind speed persistence statistics from cumulative probability distributions
S. Kuwashima and N. Hogben 9 (1985) 568

Calculation of littoral sand transport rate
J.W. Kamphuis, M.H. Davies, R.B. Nairn and O.J. Sayao 10 (1986) 1
Suspended sediments concentrations under waves
O. Nielsen 10 (1986) 23
Wave-induced pore pressures around submarine pipelines
S.E.J. Spierenburg 10 (1986) 33

Model and prototype tests for wave impact and run-up on a uniform 1:4 slope 10 (1986) 49
Numerical simulation of storm surges in Bangladesh using a bay-river coupled model
S.K. Dube, P.C. Sinha and G.D. Roy 10 (1986) 85
Wave statistics based on ship's observations
A. de Graauw 10 (1986) 105
Edge waves near a seawall
T. Green III 10 (1986) 119
A comparative study of three mathematical models for wind-generated circulation in coastal areas
C. Koutitas and M. Gousidou-Koutita 10 (1986) 127
Particle velocity prediction at the transformation point of plunging breakers
M.S. Kirkgöz 10 (1986) 139
Longshore current profiles and lateral mixing across the surf zone of a barred nearshore
B. Greenwood and D.J. Sherman 10 (1986) 149
Evaluation of risk applied to the designed breakwater of Punta Riso at Brindisi, Italy
L. Franco, A. Lamberti, A. Noli and U. Tomasicchio 10 (1986) 169
Sedimentary balances (land and sea) with special reference to the Icelandic south coast from Torlakshörn to Dyrholsey. River nourishment of shores — practical analogies on artificial nourishment
P. Bruun 10 (1986) 193
Modelling dissipation in harbor resonance
M. Gerber 10 (1986) 211
The quantification of breakwater armour profiles for design purposes
J.P. Latham and A.B. Poole 10 (1986) 253
Observations of local wind effects on longshore currents
J.M. Hubertz 10 (1986) 275
Mass flux and undertow in a surf zone, by I.A. Svendsen
W.R. Dally, R.G. Dean and I.A. Svendsen 10 (1986) 289
Effects of currents on interpretation of subsurface pressure spectra
D.W. Gabriel and T.S. Hedges 10 (1986) 309
Cross-shore mean flow in the surf zone
M.J.F. Stive and H.G. Wind 10 (1986) 325
Wave group analysis of natural wind waves based on modulational instability theory
H. Mase and Y. Iwagaki 10 (1986) 341
Rational approximations in the parabolic equation method for water waves
J.T. Kirby 10 (1986) 355
Time series surface-wave recovery from pressure gage
H. Wang, D.-Y. Lee and A. Garcia 10 (1986) 379
Effects of depth discontinuity on harbor oscillations
P.L.-F. Liu 10 (1986) 395

2DH mathematical modelling of morphological evolutions in shallow water
H.J. de Vriend 11 (1987) 1
A numerical modelling study of low-frequency circulation on the West Florida Shelf
C.K. Cooper 11 (1987) 29
Bethymetric and shear stress effects on an island's wake: a computational model study
R.A. Falconer and L. Mardapitta-Hadjipandeli 11 (1987) 57
An approximate model for nonlinear dispersion in monochromatic wave propagation models, by J.T. Kirby and R.A. Dalrymple
T.S. Hedges, J.T. Kirby and R.A. Dalrymple 11 (1987) 87
Source generation on nonlinear gravity waves with the boundary integral equation method
M. Brorsen 11 (1987) 93
The continuity equation for longshore current velocity with breaker angle adjusted for a wave-current interaction
C. Galvin 11 (1987) 115

Long-term variation of longshore sediment transport
X. Shi-Leng and L. Teh-Fu 11 (1987) 131
Long-wave transmission through porous breakwaters
P.D. Scarlots and V.P. Singh. 11 (1987) 141
An energy approach to non-breaking wave-induced motion of bottom sediment particles
M.A. Losada, J.M. Desiré and J. Merino 11 (1987) 159
Sediment by-passing across coastal inlets, by R. Silvester
P. Bruun and R. Silvester 11 (1987) 175
Forces on a smooth submarine pipeline in random waves - Comparison study
N.J. Shankar, H.-F. Cheong and K. Subbiah 11 (1987) 189
Stability of breakwater armour layers - Design formulae
J.W. van der Meer 11 (1987) 219
Analysis of wave fields generated by a directional wavemaker
Y.C. Wu and R.A. Dalrymple 11 (1987) 241
Laboratory studies of breaking wave forces acting on vertical cylinders in shallow water
C.J. Apelt and J. Piorewicz 11 (1987) 263
Scaling the rate of wind-blown sand transport by parameterization of the turbulent energy equation
S.A. Hsu 11 (1987) 283
Model and prototype tests for wave impact and run-up on a uniform 1:4 slope, by A. Führböter
P. Bruun and A. Führböter 11 (1987) 291
Measurements of forces resulting from normal and oblique wave approaches to small scale sea walls
A.F. Whillock 11 (1987) 297
Measuring waves with pressure transducers
C.T. Bishop and M.A. Donelan 11 (1987) 309
An efficient finite-difference approach to the mild-slope equation
P.A. Madsen and J. Larsen. 11 (1987) 329
Sediment concentration measurements by transverse suction
J.J. Bosman, E.T.J.M. van der Velden and C.H. Hulsbergen 11 (1987) 353
Calculating bottom orbital velocity beneath waves
R.L. Soulsby 11 (1987) 371
Wave power variation in the near-shore regions
M.M. Purandare and P.A.A. Narayana 11 (1987) 381
Comparison of 2-D and 3-D models of the steady wind-driven circulation in shallow waters
B.M. Jamart and J. Ozer 11 (1987) 393
Formulation of a continuously stratified sea model with three-dimensional representation of the upper layer
G.K. Furnes and M. Mork 11 (1987) 415
On extracting current profiles from vertically integrated numerica models
A.M. Davies 11 (1987) 445
Tidal sea mathematical modelling: Current applications and future developments
Y. Coëffé, S. Courtier and B. Latteux 11 (1987) 479
A Lagrangian model for wind- and wave-induced near-surface currents
A.D. Jenkins 11 (1987) 513
A swell model of the German Bight
J.W. Dippner 11 (1987) 527
Computation of the driving forces of wave-induced currents
M.W. Dingemans, A.C. Radder and H.J. de Vriend. 11 (1987) 539
Quasi-3D modelling on nearshore currents
H.J. de Vriend and M.J.F. Stive 11 (1987) 565
Implementation and testing of a lateral boundary scheme as an open boundary condition
E.A. Martinsen and H. Engedahl 11 (1987) 603

Mean bed friction of combined wave/current flow
B.A. O'Connor and D. Yoo 12 (1988) 1
Cross-shore currents in surf-zone modelling
I.A. Svendsen and J.B. Hansen 12 (1988) 23
Three simple models of wave sediment transport
P. Nielsen 12 (1988) 43
Numerical modelling of wave-induced currents in the presence of coastal structures
P. Gaillard 12 (1988) 63
Randomly breaking waves and surf-zone dynamics
I.O. Lenont'ev 12 (1988) 83
Flow regimes and dynamic equilibrium of morphological changes at Köyceğiz Lake Inlet, Turkey
E. Ozhan 12 (1988) 109
Combined refraction-diffraction of short waves in large coastal regions
V.G. Panchang, B.R. Pearce and B. Cushman-Roisin 12 (1988) 133
A three dimensional model of suspended particulate sediment transport
B.A. O'Connor and J. Nicholson 12 (1988) 157
Spectral characteristics of random wave run-up
H. Mase 12 (1988) 175
Nonlinear refraction-diffraction of surface waves in intermediate and shallow water
O.B. Rygg 12 (1988) 191
The dependency of inshore waves on the characteristics of offshore short waves
R.C. Nelson, P.D. Treloar and N.V. Lawson 12 (1988) 213
Abrasion testing and armourstone degradation
J.P. Latham and A.B. Poole 12 (1988) 233
Prediction of turbulent flow over rough beds
P. Justesen 12 (1988) 257
Application of longshore transport equations to the Andhra Coast, east coast of India
P. Chandramohan, B.U. Nayak and V.S. Raju 12 (1988) 285
Nearshore bars and the break-point hypothesis
A.H. Sallenger Jr. and P.A. Howd 12 (1988) 301
Longshore current and sediment transport on composite beach profiles
W.G. McDougal and R.T. Hudspeth 12 (1988) 315
Revision of SPM 1984 wave hindcast model to avoid inconsistencies in engineering applications
D.P. Hurdle and R.J.H. Stive 12 (1988) 339
Generalities on static equilibrium bays
J.R.C. Hsu, R. Silvester and Y.M. Xia 12 (1988) 353
Friction on wave-induced sheet flow
K.C. Wilson 12 (1988) 371
Measuring waves with pressure transducers, by C.T. Bishop and M.A. Donelan
P. Nielsen, C.T. Bishop and M.A. Donelan 12 (1988) 384

Wave setup and runup: An integrated approach
P. Nielsen 13 (1989) 1
A rational approach to wave friction coefficients for rough, smooth and transitional turbulent flow
D. Myrhaug 13 (1989) 11
A prediction model for stationary, short-crested waves in shallow water with ambient currents
L.H. Holthuijsen, N. Booij and T.H.C. Herbers 13 (1989) 23
Velocities in combined undertow and longshore currents
I.A. Svendsen and R.S. Lorenz 13 (1989) 55
Stability of breakwater armour layers — Design formulae, by J.W. van der Meer
P. Bruun and J.W. van der Meer 13 (1989) 81

Prediction of breaking wave forces on vertical cylinders
R.H. Swift 13 (1989) 97
Numerical analysis of liquefaction potential of partially drained seafloors
S. Tsotsos, M. Georgiadis and A. Damaskinidou 13 (1989) 117
Sand waves along the Dutch coast
H.J. Verhagen 13 (1989) 129
A simplified function for wave energy dissipation factor over mobile beds
R.C. Nelson 13 (1989) 149
Reflection and transmission characteristics of regular and random waves from a submerged horizontal plate
M. Patarapanich and H.-F. Cheong 13 (1989) 161
Application of laser Doppler velocimetry to the study of turbulence generated by swell in the vicinity of walls or obstacles
M. Bélorgey, J. Le Bas and A. Grandjean 13 (1989) 183
A note on parabolic radiation boundary conditions for elliptic wave calculations
J.T. Kirby 13 (1989) 211
A nearshore profile model of wave and tidal current interaction
H.N. Southgate 13 (1989) 219
A mathematical model for set down in harbours
J.V. Smallman and A.J. Cooper 13 (1989) 247
Beach cusps and beach dynamics: A quantitative field appraisal
E.E. Antia 13 (1989) 263
On-offshore bed-load sediment transport in the coastal zone
Z. Pruszak 13 (1989) 273
Effect of the open sea boundary conditions on storm surge simulations
V. Subramanian, R. Mahadevan and D. Srinivasan 13 (1989) 293
Numerical modelling of wave-induced currents in the presence of coastal structures, by P. Gaillard
M.R. Gourlay and P. Gaillard 13 (1989) 303
Onshore/offshore wind influence on breaking waves: An emperical study
J.S. Galloway, M.B. Collins and A.D. Moran 13 (1989) 305
Explicit modelling of bottom friction in combined wave-current flow
D. Yoo 13 (1989) 325
An experimental investigation of plunging breaker boundary layers in the transformation zone
M.S. Kirkgöz 13 (1989) 341
Shear stress distribution in dissipative water waves
R. Deigaard and J. Fredsøe 13 (1989) 357
The continuity equation for longshore current velocity with breaker angle adjusted for a wave-current interaction, by C. Galvin
P.D. Komar, J. Oltman-Shay and C. Galvin 13 (1989) 379

An efficient horizontal two-dimensional hydrodynamic model
J.P.-Y. Maa 14 (1990) 1
Periodic waves in the surf zone: analysis of experimental data
J.B. Hansen 14 (1990) 19
Reliability analysis of a coastal dike
K.O. Ronold 14 (1990) 43
Behaviour of steel-reinforced concrete amour units used in coastal defences
S.G. Millard, C.D. Davies and J.H. Bungey 14 (1990) 57
Dynamic pressures on a large vertical cylinder due to random waves
V. Sundar, S. Neelamani and C.P. Vendhan 14 (1990) 83
Numerical modelling of erosion and sedimentation around offshore pipelines
F.A. van Beek and H.G. Wind 14 (1990) 107
Breakwaters for the protection of Romanian beaches
A.N. Spătaru 14 (1990) 129

Study of suspended sediment distribution in the coastal zone
S.M. Antsyferov and R.D. Kos'yan 14 (1990) 147
The linearization of drag force and the error estimation of linear force spectrum
B. Teng and Y.-c. Li 14 (1990) 173
The dependency of inshore long waves on the characteristics of offshore short waves, by R.C. Nelson, P.D. Treloar and N.V. Lawson
J.R. Medina, R.C. Nelson, P.D. Treloar and N.V.lawson 14 (1990) 185
Waves in a harbour with partially reflecting boundaries
M. Isaacson and S. Qu 14 (1990) 193
Internal and external pressure measurements in reshaped breakwaters
K.R. Hall and D.N. Foster 14 (1990) 215
Random breaking waves: a closed-form solution for planar beaches
W.R. Dally 14 (1990) 233
A rational approach to wave-current friction coefficients for rough, smooth and transitional turbulent flow
D. Myrhaug and O.H. Slaattelid 14 (1990) 265

Introduction
J.W. van der Meer 15 (1991) 1
Deterministic computer-aided optimum design of rock rubble-mound breakwater cross-sections
W. de Haan 15 (1991) 3
Rocking armour units: Number, location and impact velocity
J.W. van der Meer and G. Heydra 15 (1991) 21
Numerical determination of wave transmission through a rubblemound breakwater at Visakhapatnam, India
S.V.S.L.N. Sastry, P. Hölscher and F.B.J. Barends 15 (1991) 41
Stability of Accropode(R) and comparison with dolosse
A.H. Holtzhausen and J.A. Zwamborn 15 (1991) 59
Experimental analysis of the load-time histories of concrete to concrete impact
J.G.M. van Mier and S. Lenos 15 (1991) 87
On the determination of concrete armour unit stresses including specific results related to Dolosse
H.F. Burcharth, G.L. Howell and Z. Liu 15 (1991) 107
Wave transformation
J.W. Kamphuis 15 (1991) 173
Incipient wave breaking
J.W. Kamphuis 15 (1991) 185
The run-up of nonbreaking and breaking solitary waves
J.A. Zelt 15 (1991) 205
A model for sediment re-entrainment and transport in shallow basin flows
K.J. Eidsvik and T. Utnes 15 (1991) 247
The modelling of the free surface flow of water over topography
B. Johns 15 (1991) 257
A numerical model of the vertical distribution of longshore currents on a plane beach
P. Dong and K. Anastasiou 15 (1991) 279
Estimating future sea level extremes under conditions of sea level rise
W.E. Bardsley, W.M. Mitchell and G.W. Lennon 15 (1991) 295
Random breaking waves: a closed-form solution for planar beaches, by W.R. Dally
R.C. Nelson and W.R. Dally 15 (1991) 299
Waves in harbour with partially reflecting structures, by M. Isaacson and S. Qu
L. Hamm, M. Isaacson and S. Qu 15 (1991) 305
A probabilistic model of rubble mound armor stability
H. Wang and S.J. Peene 15 (1991) 307

Onshore-offshore sediment transport on beaches
M.C. Quick 15 (1991) 313
The influence of armour stone gradation on dynamically stable breakwaters
K.R. Hall and J.S. Kao 15 (1991) 333
Inertia regime loading on a submarine pipeline in random waves
K. Subbiah, H.-F. Cheong and N.J. Shankar 15 (1991) 333
Dispersive shallow water waves over a porous sea bed
G. Flaten and O.B. Rygg 15 (1991) 347
Modification of coastal currents by power plant intake and thermal discharge systems
M.H.S. Elwany, J. Reitzel and M.R. Erdman 15 (1991) 359
A new form of the Boussinesq equations with improved linear dispersion characteristics
P.A. Madsen, R. Murray and O.R. Sørensen 15 (1991) 371
Cross-shore wave transformation and mean flow circulation
R.J. Thieke and R.J. Sobey 15 (1991) 387
On a highly effective wave absorber
S.W. Twu and D.T. Lin 15 (1991) 389
Patterns of nearshore sediment transport along the Nile Delta, Egypt
O.E. Frihy, A.M. Fanos, A.A. Khafagy and P.D. Komar 15 (1991) 409
The effects fo wave-induced seepage on an impervious breakwater with an extended foundation base
F. Dias and P.L. Monkmeyer 15 (1991) 417
Modelling of undertwo by a one-equation turbulence model
R. Deigaard, P. Justesen and J. Fredsze 15 (1991) 431
A virtual power function for estimating the alongshore transport of sediment by waves
J.C. Morfett 15 (1991) 439
A field study of wave reflections from an exposed dissipative beach
R.C. Nelson and J. Gonsalves 15 (1991) 457
A simple quasi-3-D model of suspended sediment transport in a nonequilibrium state
K. Nadaoka, H. Yagi and H. Kamata 15 (1991) 459
Wave groupiness variations in the nearshore
J.H. List 15 (1991) 475
Stability analysis of a two-inlet bay system
J. van de Kreeke 15 (1991) 481
Gravity waves over porous bottoms
Z. Gu and H. Wang 15 (1991) 497
On calculating the lengths of water waves
J.D. Fenton and W.D. McKee 15 (1991) 499
A review of the analyses of ocean wave groups
J.R. Medina and R.T. Hudspeth 15 (1991) 515
Velocity distributions of waves and currents in the combined flow
Z.-J. You, D.L. Wilkinson and P. Nielsen 15 (1991) 525
Vertical and horizontal structure in cross-shore flows: An example of undertow and wave set-up on a barred beach
B. Greenwood and P.D. Osborne 15 (1991) 543
Ocean waves over shoals
V. Lie and A. Tørum 15 (1991) 545
Laboratory measurements of uniform longshore currents
P.J. Visser 15 (1991) 563

Beach nourishment, philosophy and coastal protection policy
J. van de Graaff, H.D. Niemeyer and J. van Overeem 16 (1991) 3
Beach nourishment; execution methods and developments in technology
J.H. van Oorschot and G.H. van Raalte 16 (1991) 23
Beach nourishment and monitoring programme
P. Roelse, J. Coosen and F.A.J. Minneboo 16 (1991) 43

Beach nourishment and particle size effects
D.H. Swart 16 (1991) 61
Mathematical modeling of the fate of beach fill
M. Larson and N.C. Kraus 16 (1991) 83
Beach nourishment and socio-economic aspects
I.H. Townend and C.A. Fleming 16 (1991) 115
Beach and dune nourishment and environmental aspects
L.A. Adriaanse and J. Coosen 16 (1991) 129
Sea-level rise and shore nourishment: a discussion
M.J.F. Stive, R.J. Nicholls and H.J. de Vriend 16 (1991) 147
An evaluation of expressions for wave energy dissipation due to bottom friction in the presence of currents
H.L. Tolman 16 (1991) 165
A mathematical model of storm surge in the Vistula Lagoon, Poland
R. Szymkiewicz 16 (1991) 181
Stability of the seaward slope of berm breakwaters
J.W. van der Meer 16 (1991) 205
Efficient elliptic solvers for the mild-slope equation using the multigrid technique
B. Li and K. Anastasiou 16 (1991) 245
Observed and modeled resonantly interacting progressive water-waves
G. Chapalain, R. Cointe and A. Temperville 16 (1991) 267
The equivalent uniform current in wave-current computations
T.S. Hedges and B.W. Lee 16 (1991) 301
Semi-empirical treatment of wave transformation outside and inside the breaker line
K.P. Black and M.A. Rosenberg 16 (1991) 313
Edge was revisited
H.A. Schäffer and I.G. Jonsson 16 (1991) 349
Random breaking waves: field verification of a wave-by-wave algorithm for engineering application
W.R. Dally 16 (1991) 369
A simple method for calculating the velocity field beneath irregular waves
M.A. Donelan, F. Anctil and J.C. Doering 16 (1991) 399
A field study of wave reflections from an exposed dissipative beach, by R.C. Nelson and J. Gonsalves
T. Aargaard, R.C. Nelson and J. Gonsalves 16 (1991) 425

Probabilistic coastline position computations
J.K. Vrijling and G.J. Meijer 17 (1992) 1
Shore protection manual's wave prediction reviewed
C.T. Bishop, M.A. Donelan and K.K. Kahma 17 (1992) 25
Surf zone transformation of wave height to water depth ratios
R.C. Nelson and J. Gonsalves 17 (1992) 49
The dispersion of radioactive tracers along the east coast of Singapore
H.-F. Cheong, M.H.A. Khader, C.-J. Yang and R. Radhakrishnan 17 (1992) 71
Wave set-up, wave run-up and beach water table: Interaction between surf zone hydraulics and groundwater hydraulics
M.R. Gourlay 17 (1992) 93
Harmonic tidal current constituents of the western Arabian Gulf from moored current measurements
V.C. John 17 (1992) 145
Singular points at berm breakwaters: scale effects, rear, round head and longshore transport
J.W. van der Meer and J.J. Veldman 17 (1992) 153
On the application of a hydrodynamic model for a limited sea area
A.H. Al-Rabeh and N. Gunay 17 (1992) 173

On the application of a particle dispersion model
A.H. Al-Rabeh and N. Gunay 17 (1992) 195
On the spacing between observed rip currents
D.A. Huntley and A.D. Short 17 (1992) 211
Artificial beach growth for breakwater protection at the Port of Timaru, east coast, South Island, New Zealand
R.M. Kirk 17 (1992) 227
Experimental beach reconstruction-renourishment on mixed sand and gravel beaches,
W. Lagoon and R.M. Kirk 17 (1992) 253
Deterministic computer-aided optimum design of rock rubble-mound breakwater cross-sections, by W. de Haan
J.R. Medina, J.K. Vrijling and W. Meermans 17 (1992) 279

A breaking wave propagation model based on the Boussinesq equations
T.V. Karambas and C. Koutitas 18 (1992) 1
Velocity distribution in turbulent oscillatory boundary layer
Z.J. You, D.L. Wilkinson and P. Nielsen 18 (1992) 21
Wave diffraction in step-walled harbours
R.M. Gorman 18 (1992) 39
Reflection and transmission of random waves by a horizontal double-plate breakwater
H.-F. Cheong and M. Patarapanich 18 (1992) 63
Quasi-3D modelling of suspended sediment transport by currents and waves
I. Katopodi and J.S. Ribberink 18 (1992) 83
The velocity field beneath wind-waves — observations and inferences
W.M. Drennan, K.K. Kahma and M.A. Donelan 18 (1992) 111
Wave kinematics in a groin field-frequency domain analysis
V. Sundar, H. Noethel and K.P. Holz 18 (1992) 137
Wave boundary layer in flow measurements near the seabed
D. Myrhaug, K.F. Lambrakos and O.H. Slaattelid 18 (1992) 153
A new form of the Boussinesq equations with improved linear dispersion characteristics. Part 2. A slowly-varying bathymetry
P.A. Madsen and O.R. Sørensen 18 (1992) 183
Wave impact pressure and its effect upon bodies lying on the sea bed
M.J. Cooker and D.H. Peregrine 18 (1992) 205
A mathematical model of a slotted wavescreen breakwater
G.S. Bennett, P. McIver and J.V. Smallman 18 (1992) 231
A new model for surface wave propagation over undulating topography
T.J. O'Hare and A.G. Davies 18 (1992) 251
Wave forces on a pipeline through the surf zone
H.K. Endresen and A. Tørum 18 (1992) 267
Threshold of motion of coarse-grained sediment under waves in shallow water
J.C. Morfett 18 (1992) 283
Influence of water depth on the breaking wave impact on vertical and sloping walls
M.S. Kirkgöz 18 (1992) 297
On a model to propagate surface waves — a second order approach
J.C. Leitão and J.L.M. Fernandes 18 (1992) 315
Laboratory measurements of uniform longshore currents, by P.J. Visser
C. Galvin and P.J. Visser 18 (1992) 333
Efficient elliptic solvers for the mild-slope equation using the multigrid technique, by B. Li and K. Anastasiou
A.C. Radder, B. Li and K. Anastasiou 18 (1992) 347
Wave groupiness variations in the nearshore, by J.H. List
J.R. Medina and J.H. List 18 (1992) 353

Review of the field-data base for longshore sediment transport
J.S. Schoonees and A.K. Theron 19 (1993) 1
Deterministic profile modelling of nearshore processes. Part 1. Waves and currents
H.N. Southgate and R.B. Nairn 19 (1993) 27
Deterministic profile modelling of nearshore processes. Part 2. Sediment transport and beach profile development
R.B. Nairn and H.N. Southgate 19 (1993) 57
Extended refraction-diffraction equation for surface waves
S.R. Massel 19 (1993) 97
Dissipation in random wave groups incident on a beach
J.A. Roelvink 19 (1993) 127
Experimental investigation of wave propagation over a bar
S. Beji and J.A. Battjes 19 (1993) 151
Beaches downcoast of harbours in bays
J.R.C. Hsu, T. Uda and R. Silvester 19 (1993) 163
A simplified model for wave height and set-up in the surf zone
R.H. Swift 19 (1993) 189
Interaction of short-crested random waves and large-scale currents
T.S. Hedges, R.G. Tickell and J. Akrigg 19 (1993) 207
Bottom friction effects in the combined flow field of random waves and currents
Y. Zhao and K. Anastasiou 19 (1993) 223
The analysis of beach profile changes using Dean's method and empirical orthogonal functions
Z. Pruszak 19 (1993) 245
A comparison of two spectral wave models in the Southern California Bight
W.C. O'Reilly and R.T. Guza 19 (1993) 263
Surf zone wave parameters from experimental data
I.A. Svendsen and U. Putrevu 19 (1993) 283
Estimation of sand transport by use of tracers along a reclaimed shoreline at Singapore Changi Airport
H.-F. Cheong, N.J. Shankar, R. Radhakrishnan and A.-C. Toh 19 (1993) 311
An evaluation of expressions for wave energy dissipation due to bottom friction in the prescence of currents, by H.L. Tolman.
H.L. Tolman 19 (1993) 327

Effects of breaking wave induced turbulence within a longshore current model
J.C. Church and E.B. Thornton 20 (1993) 1
Nonlinear evolution of a unidirectional shoaling wave field
Y. Agnon, A. Sheremet, J. Gonsalves and M. Stiassnie 20 (1993) 29
Economical random wave propagation modelling taking into account non-linear amplitude dispersion
Y. Zhao and K. Anastasiou 20 (1993) 59
Numerical solution of the elliptic mild-slope equation for irregular wave propagation
B. Li, D.E. Reeve and C.A. Fleming 20 (1993) 85
Waves and currents on natural beaches: a quasi 3-D numerical model
M.-H.G. Briand and J.W. Kamphuis 20 (1993) 101
Sediment transport in the surf zone: a quasi 3-D numerical model
M.-H.G. Briand and J.W. Kamphuis 20 (1993) 135
A note on the three-dimensional shear stress distribution in a surf zone
R. Deigaard 20 (1993) 157
The wave vane — a device to measure the breaker angle
P. Chandramohan, B.U. Nayak and N.M. Anand 20 (1993) 173
A Boussinesq model for waves breaking in shallow water
H.A. Schäffer, P.A. Madsen and R. Deigaard 20 (1993) 185

Wave spectrum filtration by current and wave height calculation
I. Kantardgi and Y. Dreyzis 20 (1993) 203
Laboratory wave reflection analysis using co-located gages
S.A. Hughes 20 (1993) 223
Wave groups: a closer look at spectral methods
D. Masson and P. Chandler 20 (1993) 249
Bed shear stress measurements over a smooth bed in three-dimensional wave-current motion
M.M. Arnskov, J. Fredsøe and B.M. Sumer 20 (1993) 277
Wave boundary layers in a convergent tunnel
B.M. Sumer, T.S. Laursen and J. Fredsøe 20 (1993) 317

Wave transformation in the nearshore zone
L. Hamm, P.A. Madsen and D.H. Peregrine 21 (1993) 5
Wave-current interaction within and outside the bottom boundary layer
R.L. Soulsby, L. Hamm, G. Klopman, D. Myrhaug, R.R. Simons and G.P. Thomas 21 (1993) 41
Modelling of non-cohesive sediment transport processes in the marine environment
J. Fredsøe 21 (1993) 71
The characterisation of cohesive sediment properties
J. Berlamont, M. Ockenden, E. Toorman and J. Winterwerp 21 (1993) 105
Cohesive sediment transport processes
C. Teisson, M. Ockenden, P. Le Hir, C. Kranenburg and L. Hamm 21 (1993) 129
Cross-shore profile models
J.A. Roelvink and I. Brøker 21 (1993) 163
Medium-term 2DH coastal area modelling
H.J. De Vriend, J. Zyserman, J. Nicholson, J.A. Roelvink, P. Péchon and H.N. Southgate . 21 (1993) 193
Approaches to long-term modelling of coastal morphology: a review
H.J. De Vriend, M. Capobianco, T. Chesher, H.E. De Swart, B. Latteux and M.J.F. Stive . 21 (1993) 225
Wave grouping and sequential correlation, field studies in Italian coastal areas
A. Lamberti and V. Rossi 21 (1993) 271
Statistical and hydrodynamic models for the operational forecasting of floods in the Venice Lagoon
J. Vieira, J. Føns and G. Cecconi 21 (1993) 301
Effects of bathymetric complexities and wind generation in a coastal wave propagation model
C. Bondzie and V.G. Panchang 21 (1993) 333

Review and analysis of vertical breakwater failures — lessons learned
H. Oumeraci 22 (1994) 3
Vertical breakwaters: the Italian experience
L. Franco 22 (1994) 31
Design and construction of caisson breakwaters — the Japanese experience
K. Tanimoto and S. Takahashi 22 (1994) 57
Wave impact pressure on vertical walls under breaking waves of various types
M. Hattori, A. Arami and T. Yui 22 (1994) 79
Mechanics of deep water plunging-wave impacts on vertical structures
E.-S. Chan 22 (1994) 115
Dynamic response of upright breakwaters to impulsive breaking wave forces
Y. Goda 22 (1994) 135
Analysis of the dynamic response of caisson breakwaters
H. Oumeraci and A. Kortenhaus 22 (1994) 159
Inertia dominated forces on oblique horizontal cylinders in waves near a plane boundary
N. Chioukh and R. Narayanan 22 (1994) 185
On the theory of the joint probability of heights and periods of sea waves
C.D. Memos 22 (1994) 201
Numerical results of the joint probability of heights and periods of sea waves
C.D. Memos and K. Tzanis 22 (1994) 217

Full-range equation of friction coefficient and phase difference in a wave-current boundary layer
H. Tanaka and A. Thu 22 (1994) 237
Geometry prediction for wave-generated bedforms
G.R. Mogridge, M.H. Davies and D.H. Willis 22 (1994) 255
A model of morphological behaviour of tidal basins
A.R. van Dongeren and H.J. de Vriend 22 (1994) 287
The modelling of wave action on and in coastal structures
M.R.A. van Gent 22 (1994) 311

Numerical simulation of nonlinear wave propagation over a bar
S. Beji and J.A. Battjes 23 (1994) 1
Wave transformation on a coral reef
M.R. Gourlay 23 (1994) 17
Depth limited design wave heights in very flat regions
R.C. Nelson 23 (1994) 43
Tidal inlet stability in response to hydrodynamic and sediment dynamic conditions
S. Gao and M. Collins 23 (1994) 61
Transfer function between wave height and wave pressure for progressive waves
Y.-Y. Kuo and Y.-F. Chiu 23 (1994) 81
Suspended sediment load during an asymmetric wave cycle over a plane bed
K. Black 23 (1994) 95
Breaking wave forces on horizontal cylinders close to the sea bed
Y. Yuksel and R. Narayanan 23 (1994) 115
Reflection characteristics of permeable seawalls
V. Mailayachari and V. Sundar 23 (1994) 135
Laboratory investigation of dune erosion as a function of sand grain size and dune density
M.F. Overton, W.A. Pratikto, J.C. Lu and J.S. Fisher 23 (1994) 151
Estimation of wave height duration statistics
M. Mathiesen 23 (1994) 167
Parabolic approximations for water waves in conformal coordinate systems
J.T. Kirby, R.A. Dalrymple and H. Kaku 23 (1994) 185
A generalized conjugate gradient model for the mild slope equation
B. Li 23 (1994) 215
An evolution equation for water waves
B. Li 23 (1994) 227
An analytical model of crenulate shaped beaches
H.G. Wind 23 (1994) 243
On the prediction of beach changes by a new 2-D empirical eigenfunction model
T.-W. Hsu, S.-H. Ou and S.-K. Wang 23 (1994) 255
A three-dimensional PC-based hydrodynamic model using an ADI scheme
C. Kim and J. Lee 23 (1994) 271
A simple model for current velocity profiles in combined wave-current flows
Z.-J. You 23 (1994) 289
A morphological behaviour model for the outer delta of mixed-energy tidal inlets
H.J. de Vriend, W.T. Bakker and D.P. Bilse 23 (1994) 305
Flume experiments on the erosion of till shores by waves
M.G. Skafel and C.T. Bishop 23 (1994) 329

Transformation of a nonlinear wave train passing over a submerged shelf without breaking
T. Ohyama and K. Nadaoka 24 (1994) 1
Vortex generation in water waves propagating over a submerged obstacle
F.C.K. Ting and Y.-K. Kim 24 (1994) 23
Observation of undertow and turbulence in a laboratory surf zone
F.C.K. Ting and J.T. Kirby 24 (1994) 51

Numerical prediction of wave boundary layer over a bed with a change in roughness
T.S. Laursen, J. Fredsøe and B.M. Sumer 24 (1994) 81
A computational model of the wave absorption by the multilayer porous media
S.W. Twu and Y.T. Wang 24 (1994) 97
Nearshore waveheight during storms
M.J. Tucker. 24 (1994) 111
Suspended sand measurements in a turbulent environment: field comparison of optical and pump sampling techniques
K.P. Black and M.A. Rosenberg. 24 (1994) 137
Measurements of a 2-D non-buoyant jet in a wave environment
R. Koole and C. Swan 24 (1994) 151
Dynamics of surf-zone turbulence in a strong plunging breaker
F.C.K. Ting and J.T.Kirby 24 (1994) 177
A time-domain method for separating incident and reflected irregular waves
P. Frigaard and M. Brorsen 24 (1994) 205
Comparison of oscillatory and stationary flow through porous media
K.R. Hall, G.M. Smith and D.J. Turcke 24 (1994) 217
On the one-dimensional steady and unsteady porous flow equations
H.F. Burcharth and O.H. Andersen 24 (1994) 233
Bottom friction beneath random waves
D. Myrhaug. 24 (1994) 259
Numerical and hydraulic model study of wave decay on a shelf beach
K.A. Rakha and J.W. Kamphuis. 24 (1994) 275
Applicability of numerical models to nonlinear dispersive waves
T. Ohyama, W. Kioka and A. Tada 24 (1994) 297
Nearshore circulation and dredged material transport at Waikiki Beach
N. Wang and F. Gerritsen 24 (1994) 315
Laboratory measurement of nearshore velocities and erosion of cohesive sediment (till) shorelines
M.G. Skafel. 24 (1994) 343
Transfer function between wave height and wave pressure for progressive waves, by Y.-Y. Kuo and J.-F. Chiu: comments
A. Baquerizo and M.A. Losada 24 (1994) 351
Transfer function between wave height and wave pressure for progressive waves: reply to the comments of A. Baquerizo and M.A. Losada
Y.-Y. Kuo and J.-F. Chiu 24 (1994) 355
Bottom friction effects in the combined flow field of random waves and currents, by Z. Zhao and K. Anastasiou: comments
Z.-J. You 24 (1994) 357

Evaluation of 10 cross-shore sediment transport/morphological models
J.S. Schoonees and A.K. Theron. 25 (1995) 1
Fourth-order theory for multiple-wave interaction
T. Ohyama, D.-S. Jeng and J.R.C. Hsu 25 (1995) 43
Wave bed friction damping over shoaling, movable beds
R.C. Nelson. 25 (1995) 65
Note on nonlinearity parameter of surface waves
S. Beji 25 (1995) 81
Laboratory study of plunging wave impacts on vertical cylinders
E.-S. Chan, H.-F. Cheong and B.-C. Tan 25 (1995) 87
Evaluation of design waves along the Adriatic coast of teh Venice lagoon
D. Hurdle, P.D. Girolamo and G. Pellegrini. 25 (1995) 109
On the vertical distribution of $\langle \overline{u}\overline{w} \rangle$
F.J. Rivero and A.S. Arcilla 25 (1995) 137

Initial motion of sediment under waves and wave-current combined motions
H. Tanaka and D. Van to 25 (1995) 153
Magnitude and cross-shore distribution of bed return flow measured on natural beaches
G. Masselink and K.P. Black 25 (1995) 165
Effects of wave asymmetry on sheet flow
K.C. Wilson, J.S. Andersen and J.K. Shaw 25 (1995) 191
Sheet flow and suspension of sand in oscillatory boundary layers
J.S. Ribberink and A.A. Al-Salem 25 (1995) 205
Sea ripple formation: the turbulent boundary layer case
E. Foti and P. Blondeaux 25 (1995) 227
Sea ripple formation: the heterogeneous sediment case
E. Foti and P. Blondeaux 25 (1995) 237

Further enhancements of Boussinesq-type equations
H.A. Schäffer and P.A. Madsen 26 (1995) 1
Parametrization of orbital velocity asymmetries of shoaling and breaking waves using bispectral analysis
J.C. Doering and A.J. Bowen 26 (1995) 15
Stochastic characteristics of wave kinematics in laboratory-scale random waves
W. Cieślikiewicz and O.T. Gudmestad 26 (1995) 35
Subgrid modeling of moveable-bed bottom friction in wind wave models
H.L. Tolman 26 (1995) 57
Experimental study of wave-induced flow in a porous structure
I.J. Losada, M.A. Losada and F.L. Martín 26 (1995) 77
A simple model for current velocity profiles in combined wave-current flows, by Z.-J. You:
P. Nielsen 26 (1995) 99
A simple model for current velocity profiles in combined wave-current flows: reply to the comments by P. Nielsen
Z.-J. You 26 (1995) 101
Nearshore waveheight during storms, by M.J. Tucker:
S.A. Hughes 26 (1995) 105
Nearshore waveheight during storms: reply to the comments of S.A. Hughes
M.J. Tucker 26 (1995) 109
Laboratory investigations into wave period effects on sand bed erodibility, under the combined action of waves and currents
G. Voulgaris, S. Wallbridge, B.N. Tomlinson and M.B. Collins 26 (1995) 117
Triple annual maximum series in wave climate analyses
